

# Chronic Condition Self-Management

## WA Chronic Health Conditions Framework 2011-16

The [WA Chronic Health Conditions Framework 2011-2016](#) is underpinned by four guiding principles based on evidence provided in models of care. The principles include:

1. Integration and service coordination.
2. Interdisciplinary care planning and case management.
3. Evidence-based and consumer-centred care.
4. Health literacy and self-management for chronic health conditions.

Based on these guiding principles, the Framework describes:

- Priority areas for action
- Service delivery components across the continuum of care common to chronic health conditions
- Recommendations for addressing service delivery for consumers with chronic health conditions
- System enablers to achieve service delivery improvements.

These elements are informed by the relevant [model of care](#), within the context of contemporary State and Commonwealth Government health policy
