If a code is not listed, please contact the Inpatient Data Collections Manager (*refer to Part A:HMDS Reference Manual - Contact Details*) so that it can be added to the lists.

The establishments listed are sorted in alphabetic order by establishment name. In addition to the establishment code and corresponding name, the list includes four columns as follows:

**HMDS INTERFACE FILE SPECIFICATIONS  
FOR JULY 2018  
PRIVATE HOSPITALS**

Version 1

# HMDS Interface File Specifications – July 2018

## Multi-liner file specifications – Private Hospitals (G9)

These file specifications apply to Western Australian private hospitals and day surgeries submitting multi-liner inpatient summaries to Hospital Morbidity Data System (HMDS).

The first line for each separation contains demographic information. A set of Diagnosis/External Cause/Morphology codes is placed on subsequent lines, one code per line, in the order they are coded. A set of Procedure codes is placed after the above lines, if there are any procedures performed. Finally, a check line is placed at the end of each separation. All data items must be left aligned and cannot be blank unless otherwise stated. This set of records is repeated, as required, for each inpatient summary being submitted to HMDS.
